## PROFILE

---

I'm a 21-year-old student currently immersed in the world of English Language & Media Communications at university. During my studies, I found a thrilling new passion for technology, precisely Front-end Web Development, and I've since graduated from edX's Trilogy Bootcamp that specialises in that sector of Tech. This blend of linguistics and tech skills have given me a unique edge in problem-solving and analysis – an invaluable skill in this dynamic tech industry.

As I'm always hungry to learn, I'm constantly keeping up with the latest trends and technologies to enhance my abilities and stay in sync with this fast-paced field. I'm eager to connect with fellow professionals in tech and anyone who shares my fascination for language and communication.

I hope to explore new opportunities and ideas with you, as collaboration and growth are my driving forces.
